Subject: Re: A-2518(a) Environmental Protection Information Center (EPIC) & North Group of the Redwood Chapter Sierra Club

Dear Mr. Wyels and Ms. Crowl,

The North Group Redwood Chapter of the Sierra Club supports EPIC's request to move petition A-2518(a) from abeyance and to reactivate the petition. Based on likely failure by the Regional Board to comply with the directive of the State Board, we also wish to move forward with the administrative petition.

North Group joins EPIC in urging the State Board to compel the Regional Board to act in a timely manner, and absent that, to step in and properly and effectively regulate sediment pollution in the Elk River.

Dear Mr. Wyels and Ms. Crowl,

I am writing to provide notice that on February 1, 2019, the Environmental Protection Information Center (EPIC) would like to move our petition from abeyance and reactivate our petition. As you know, the State Board directed in its adoption of the Elk River TMDL that the Regional Board revise its watershed WDRs for Green Diamond Resource Company and Humboldt Redwood Company by January 2019. EPIC has been waiting for the Regional Board to take this required action. Based on the likely failure by the Regional Board to comply with the directive of the State Board, we wish to move forward with our administrative petition.

EPIC urges the State Board to compel the Regional Board to act in a timely manner, and absent that, step in and regulate sediment pollution in the Elk River.

Sincerely,

Tom Wheeler
